## Memorandum

**To:** Crescent School District Elementary Parents and the Joyce Community

**From:** David Bingham, Superintendent

**Date:** March 8, 2019

**Subject:** Elementary Math Curriculum Adoption

---

In partnership with the school administration, the Elementary classroom teachers have been working collaboratively to support continuous improvements in our school. The Crescent Elementary staff has spent the past 7 months researching math curriculums to implement during the 2019/2020 school year. Using data collected from [www.edreports.org](http://www.edreports.org), the group chose three of the highest rated curriculums in meeting current teaching and learning standards; to further research, pilot in classrooms and discuss how they will benefit the students at Crescent Elementary School.

This memorandum serves as a notice that after careful consideration, the team would like to recommend Bridges in Mathematics to the Board of Directors for approval at their meeting on March 28<sup>th</sup>, 2019. The team found the Bridges curriculum to be the closest match for building math capacity in students and teachers in the Crescent School District as we move forward.

If you have questions or seek further information please feel free to contact me or your student's classroom teacher by March 22, 2019. If you have questions about Bridges visit <https://www.mathlearningcenter.org/bridges> for more information.
